### **COFFEEKILLERS**

Italian musician, Claudio Scurati originally started up 'Coffeekillers' as an experiment. The ethos behind the music was to create prog-rock inspired music using drum-machines and mixing it with guitars, bass and keyboards. The songs were originally born as instrumental soundtracks for everyday life. However then Guido Plancher joined the band and gave voice to the melody. With inspiration from 70's rock music like Pink Floyd and Led Zeppelin and from Brit virtuosos Joy Division, The Cure, and Muse are you ready to join in with the experiment that is 'Coffeekillers'?
