LUCINDA SIEGER

Glasgow born singer-songwriter Lucinda Sieger's first guitar was a self made cereal weetabix box, a hole strategically cut out with rubber bands across it and thus Lucinda began to write her first songs at an early age. Later Lucinda's career in furniture design was soon eclipsed by her involvement with the music world. Her crystalline voice spawned musical liaisons with many successful artists including members of **Leftfield** and **Bronski Beat**. She is a cult figure in Japan as a result of her single "**Sunset Red**" and recently performed in Sweden with an appearance on Swedish TV show "Living Room" with co-guest Ardal O'Hanlon (Father Ted) and Harry Shearer (The Simpsons).

Achieving commercial success with **UK number one** dance track "**40 Miles**" (Congress), on which she supplied the alluring vocals with an appearance on the first live Top of the Pops.

"**Silver Life**" hits the stores in June with its **summer breeze and luscious vocals**. Acoustic tracks, "**Now here we are**" a warm song about friendship and the stories that get passed around the table of life and "Silver Life" the title track, co-written with gifted guitarist Reid Savage (Way of the West). In "**Bread**" Lucinda combines her writing and performing talents with those of Winston Blissett who records and tours with heavyweight musicians like Robbie Williams and Massive Attack.

Featuring remixes by world music maestros, **Temple of Sound** and sound-scapers, **Slipper** (Loop Guru), Lucinda's compositions successfully fuse ambient folk, jazz and dance in varying measures. Silver Life focuses on creative remixes of tracks from her previous project "Heart in the Sky" which she co-produced with Temple of Sound.

"Silver Life" includes the MPEG movie for the forthcoming summer single download remix of "**Hollywood**"
